Profile

In spite of I'm Dedicated biological study with more than 4 years of experience at college using modern biology techniques, I'm a passionate front-end developpe and UX/UI designer, and creative person who always tries to fill my design works with inventive ideas to connect user problems to design solutions. I have extensive experience developing and supporting user workflows, solid UI/UX design background, strong experience using Figma to create wireframes, mockups, prototypes to communicate, develop, and challenge ideas. I like to code my designs, and enjoy bringing ideas to life in the browser by using react framework and dev tools.
